

Table of contents

Definition of terms	3
1 Introduction	9
2 Motivation	11
2.1 Background	11
2.1.1 Challenges of HCI.....	11
2.1.2 Designing intelligent user interfaces.....	12
2.1.3 Design problems on the Web	13
2.2 Goals.....	15
2.2.1 Analysing, designing and bridging	15
2.2.2 Methodology	16
3 Related research	17
4 Adaptivity.....	19
4.1 A model for IUI.....	19
4.1.1 Multimedia analysis	20
4.1.2 Multimedia presentation	20
4.1.3 Automated graphic design	20
4.1.4 Modelling and plan detection.....	20
4.1.5 Model based approaches	21
4.1.6 Agents	21
4.2 Adaptive systems.....	22
4.2.1 Classification of adaptive systems	22
4.2.2 Factors and roles	23
4.3 Models add power to adaptive systems.....	24
4.3.1 The importance of external models.....	24
4.3.2 Representation.....	25
4.3.3 Acquisition, maintenance and reasoning	25
4.3.4 ITS, an illustrating example	27
4.4 Adaptive hypermedia	27
4.4.1 A brief history of adaptivity.....	28
4.4.2 Recommenders - an example of adaptive hypermedia challenges	28
4.4.3 Other approaches to individualised presentations.....	29
4.4.4 Future challenges	29
4.5 Planning an adaptive hypertext system	29
4.5.1 Building a domain model.....	30
4.5.2 User modelling.....	30
4.5.3 Generating adaptive presentations	31
5 It's all about models	33
5.1 Extracting information	33
5.1.1 Hypothesis of this thesis	33
5.1.2 Some possible approaches	34
5.1.3 What is HTML?	35
5.1.4 Using tags in the conceptualization process	36
5.1.5 Importance of the elements	37
5.1.6 Using IR-techniques within important elements.....	41
5.1.7 Domain specific list	42
5.1.8 Other ways to extract information	43

5.2 A domain model in the horizon.....	43
5.2.1 The sets of candidate concepts.....	43
5.2.2 Values separate the candidates.....	45
5.2.3 Their fate is in the hands of Heuristics	46
5.2.4 Ensuring flexibility	51
5.2.5 Relationship types	52
5.2.6 Completing the domain model.....	59
5.3 Generating adaptive presentations	60
5.3.1 Structure of the user model	60
5.3.2 Adaptation Model	62
5.3.3 Various forms of adaptations	63
6 Implementation and evaluation	65
6.1 Realising the domain model.....	65
6.1.1 A walk through the conceptualization processes	65
6.1.2 Seaming up the domain model.....	68
6.2 Possibilities for the AHS	75
6.2.1 Picturing a simple user model.....	75
6.2.2 Adaptation rules	77
6.3 Evaluation.....	80
6.3.1 Optimizing and justifying the performance	80
6.3.2 An ocean of relations	83
6.3.3 Document concepts vs. element concepts.....	83
6.3.4 Clean up the mess before the guests pay you a visit.....	85
7 Conclusion.....	87
References	89
Appendix A - Source documents	93
Appendix B - Results from conceptualization	97
Appendix C - Results from PROLOG rules.....	103
Appendix D - PROLOG implementation.....	105
Appendix E - Implementation of conceptualizer	109
